Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. This communication is responsive to Amendment filed 6/30/2005.
2. Claims 1-6 are pending in the application. Claims 1 and 4 are independent claims. In Amendment, claims 1-6 have been amended. This action is made Final.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Callaway et al. ("Callaway", US 5,043,919) in view of Schauser (US 6,331,855).

As per claim 1, Callaway teaches a system comprising a remote computer and a plurality of user terminals, a method of updating the display at a user terminal comprising the following steps (col.1, lines 14-39):

receiving a screen of information transmitted from the remote computer (col.1, lines 16-17);

dividing the screen into a plurality of objects (col.5, lines 11-21);

detecting which of the objects are affected by input by a user (col.5, lines 24-26);

sending information regarding the user input to the remote computer (col.5, lines 46-49);

receiving a new screen of information (col.5, lines 46-49); and

comparing only the affected objects in the new screen and the old screen (col.4, lines 45-55).

Art Unit: 2174

Callaway does not teach the steps to be carried out at the user terminal. Schauser teaches the updating of display information in which the detection and updating of the screens can be performed at the user terminal (col.3, lines 57-63). It would have been obvious to one of ordinary skill in the art at the time of the invention to include Schauser's teaching with Callaway's system in order to give more control to the user terminal and less work to be done by the host.

As per claim 2, Callaway teaches said objects to comprise fields into which data is to be entered by a user (col.5, lines 14-21).

As per claim 3, Callaway teaches said objects to comprise character positions into which data is to be entered by a user (col.5, lines 46-49).

The limitations of independent claim 4 are similar in scope to the limitations of independent claim 1, and are therefore rejected under similar rationale. In addition, Callaway teaches recreating only the changes in the affected objects in the user display (col.5, lines 46-49).

Claims 5-6 are similar in scope to claims 2-3 respectively, and are therefore rejected under similar rationale.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
